IL CRISTALLO CHE VUOI VIVERE

MAC STOPA

HYBRID
COLLECTION

Dalla sinergia fra l'alta tecnologia e la qualità Casali ed il design di Mac Stopa nasce una nuova collezione.

La Hybrid Collection creata da Mac Stopa per Casali nasce dalla passione di Mac per il design innovativo basato sul connubio fra geometrie digitali e geometrie organiche casuali create dalla natura.

Durante la **Interni Hybrid Architecture and Design exhibition**, organizzata dalla rivista Interni durante la **Milan Design Week 2013**, Mac ha introdotto ad un ampio pubblico, come parte della sua installazione, il suo disegno 3D su tappeti, rivestimenti murali ed imbottiti come parte dell'interior design della Press Room di **Interni**. Ispirato dalla bellezza del vetro, nella Hybrid Collection Mac supera i limiti e porta il design basato sulla casualità tridimensionale ad un livello successivo.

"Amo il vetro per la sua bellezza naturale e le infinite possibilità di design che offre. Per la Hybrid Collection ho deciso di usare la trasparenza del vetro per poter raggiungere espressioni artistiche multiple nell'organizzazione casuale dei disegni."

From the synergy between high technology and quality of Casali and the design from Mac Stopa a new collection is born.

The Hybrid Collection by Mac Stopa for Casali has its genesis in Mac's passion for creating innovative design based on digital geometries and organic random geometries created by nature.

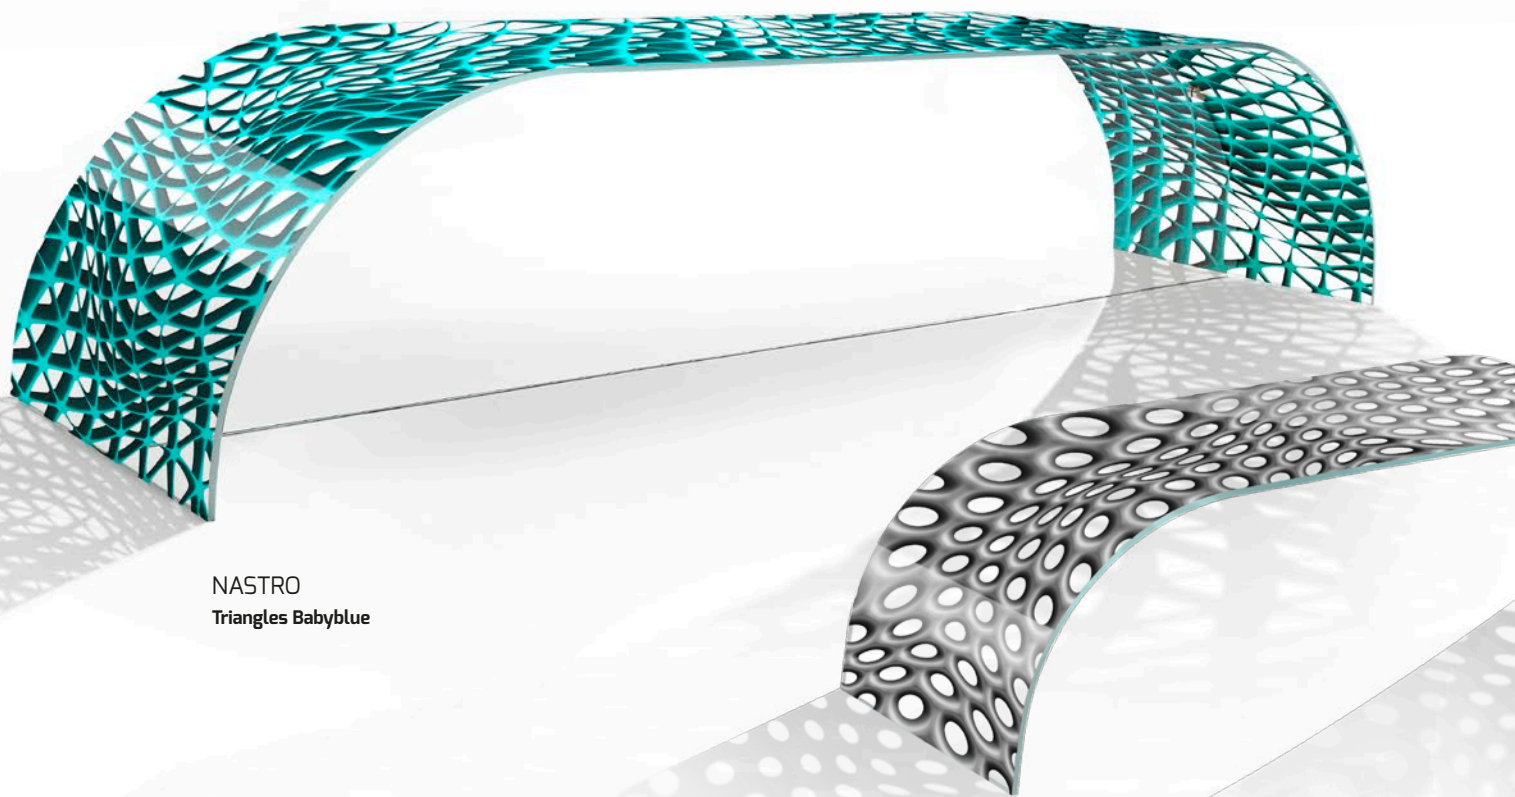

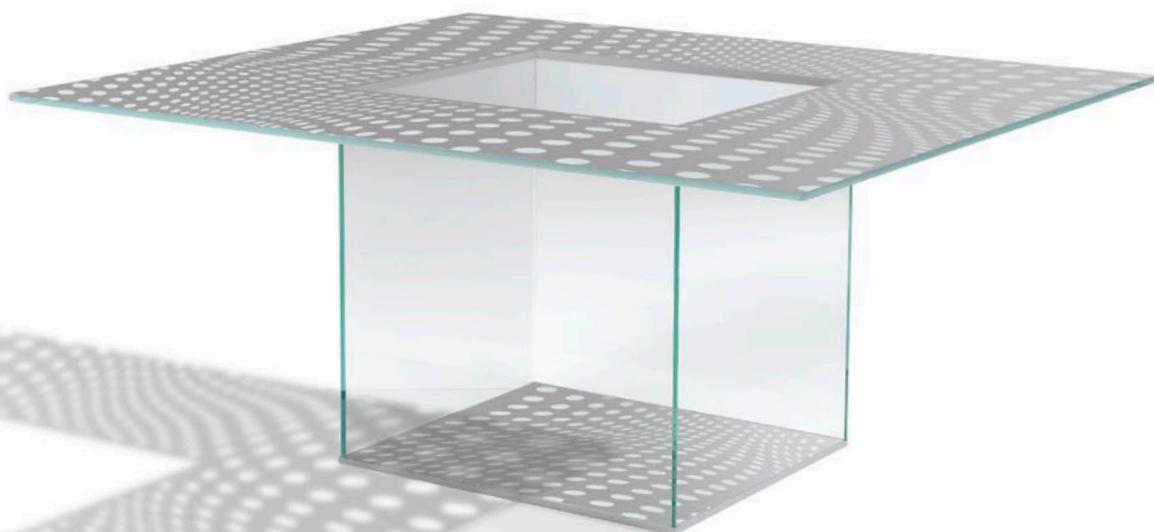

*As part of his installation during the **Interni Hybrid Architecture and Design exhibition** organized by Interni magazine during **Milan Design Week 2013**, Mac introduced to a wider audience his 3-D patterns on carpet, wall covering and upholstery as part of the interior design of the **Interni Press Room**. Inspired by the beauty of glass, in the Hybrid Collection, Mac pushes boundaries and takes his design based on three-dimensional randomness to the next level.*

"I love glass for its natural beauty and endless design possibilities glass offers. For the Hybrid Collection, I decided to use transparent natural glass that allows me to achieve multiple artistic expressions in organized randomness of the patterns."
